Secret Security Clearance (granted)

PROFESSIONAL SUMMARY

Full-stack software engineer with 4+ years of experience building mission-critical applications in DoD and enterprise environments. Proficient in Python, SQL, and JavaScript/TypeScript, with hands-on experience designing scalable backends, graph database solutions, and data analytics pipelines. Track record of owning complex deliverables end-to-end across fast-moving, high-stakes environments — from DoD security compliance to enterprise fintech systems. Holds Secret Security Clearance (granted) with experience achieving DoD IL2/IL4 compliance.

WORK EXPERIENCE

Software Developer — Infosys

Dec 2021 – May 2026

Remote — Clients: Morgan Stanley, Citizens Bank, Kroger Pharmacy, Prime Therapeutics

- Designed and maintained RESTful APIs with Spring Boot across multiple financial services and healthcare clients
- Built and maintained frontend applications using JavaScript/TypeScript with Angular 15 and React, delivering client-facing features for enterprise financial services platforms.
- Leveraged GitHub Copilot agent mode to autonomously execute multi-file refactors, triage test failures, and accelerate feature delivery across Spring Boot, Angular, and React codebases.
- Built asynchronous messaging pipelines using Spring Integration and RabbitMQ, enabling decoupled microservices communication and improving system reliability.
- Wrote complex SQL queries across Oracle and PostgreSQL databases to generate KPI reports, enabling data-driven decision-making for enterprise stakeholders.
- Managed Oracle and PostgreSQL databases with Spring Data JPA and DTOs, ensuring data integrity across distributed microservice architectures.
- Automated end-to-end testing with Selenium and TestNG; implemented JUnit unit tests integrated into CI/CD pipelines, reducing regression risk across releases.

Software Engineer II — Advanced Digital Learning (DoD Subcontractor)

Aug 2024 – Nov 2025

Remote

- Built secure backend APIs with Django (Python), implementing authentication, authorization, and data validation to meet DoD IL2/IL4 compliance standards.
- Architected graph database solutions using Neo4j and the Python driver, modeling complex relational data structures to power advanced queries and operational dashboards.
- Automated data ingestion and processing workflows with Python scripts, reducing manual effort and improving pipeline reliability for mission-critical data flows.
- Developed responsive frontend applications using Next.js and React, delivering intuitive dashboards for DoD operational use cases.
- Remediated security vulnerabilities surfaced by VAT scans and SonarQube analysis, contributing directly to Impact Level compliance and audit readiness.
- Maintained GitLab CI/CD pipelines and configured Kubernetes deployments compatible with GCP GKE for containerized application delivery.

Software Developer — Freddie Mac

Sep 2022 – Oct 2023

McLean, VA

- Built and maintained two greenfield Angular 15 applications, improving the counterparty user experience for 500+ accounts across Freddie Mac's financial platform.
- Refactored a monolithic legacy application into a micro-frontend architecture using Module Federation, improving scalability and independent deployability.
- Designed and implemented REST APIs with Spring Boot (MVC) and PostgreSQL, applying Spring Data JPA and DTOs to ensure data consistency across microservices.
- Developed Java-based business logic driving core application functionality, and integrated services into CI/CD pipelines to enable rapid, reliable feature delivery.

SKILLS & TECHNOLOGIES

Languages: Python, SQL, JavaScript, TypeScript, Java
Databases: PostgreSQL, Oracle, Neo4j (graph), MongoDB
Cloud & DevOps: Kubernetes (GKE-compatible), Docker, GitLab CI/CD, Linux
Frameworks & Tools: Django, Spring Boot, Angular, React, Next.js, Spring Data JPA, RabbitMQ, RxJS, Git
Agentic AI: GitHub Copilot agent mode, Claude Code, Anthropic API, n8n
Data & Analytics: Tableau, pandas, SonarQube, Selenium, TestNG, JUnit

EDUCATION

M.S. Data Analytics — Western Governors University <i>Salt Lake City, UT</i>	Nov 2023
B.S. Industrial Engineering — University of Central Florida <i>Orlando, FL</i>	May 2021

EXTRACURRICULAR

PENCIL Program Mentor | Feb – May 2024
Mentored high school students in frontend design principles.
